

# Solar Household Energy

Solar cooking for Human Development and Environmental Relief

January 2018 Newsletter

Dear friends,

[The 2017 Annual Report is here!](#) We hope you enjoy this summary of our projects to support solar cooker social enterprises in Haiti, Mexico, Uganda and Kenya, our humanitarian efforts in Chad refugee camps, as well as our advances in solar cooker research and design, and education. You can also find out more about our team, our Gold-standard commitment to accountability and transparency, our future plans, and read a letter from the President of the Board.

Sunny wishes for the New Year!

The SHE Team

Solar Household Energy is a 501(c)3 non-profit. Please like us on Facebook, join our Washington, DC area solar cooking meetup group, follow us on Twitter @SolarHouseholdEnergy, and check out our website: [www.solarhouseholdenergy.org](http://www.solarhouseholdenergy.org)

## Donate to Solar Household Energy!

### What your contribution can provide:

**\$40** = Training of a solar cooking ambassador in a rural Mexican village, and the means to effect change within their community.

**\$75** = Three solar cooker kits for three families, and a smoke free environment.

**\$150** = Four solar cookers and long-term follow-up for four families, and a means to self-sustainability.

**\$500** = A month's worth of solar cooking social enterprise start-up costs, and enhanced capacity and livelihood.

### Volunteer and internship opportunities in:

- technology research
- local education/demos
- field project support
- administrative support
- fundraising
- website/social media
- writing/editing
