

Solar Household Energy

Solar cooking for Human Development and Environmental Relief

Addressing Donation issues

Dear friends,

Last Tuesday we sent out an appeal for donations on Giving Tuesday. Since then, thanks to several of you who came forward about your unsuccessful attempts to donate, we looked into these issues and address them here.

1. [Network for Good](#) link goes to an **error page saying cookies must be enabled** to make a donation. We have notified Network for Good of this problem and they said they would put their technical team on it. In the meantime, we find that the link usually works the second time you try clicking on it, opening up a second tab. **Please click on the link twice!**

2. [Network for Good](#) does not allow donations using international credit cards. However, it does allow for the use of **international PayPal accounts**.

3. There is nowhere to donate on [AmazonSmile](#). Rather, when you shop on AmazonSmile, the AmazonSmile Foundation will donate 0.5% of the purchase price of eligible products to the charitable organization of your choice. **Please select Solar Household Energy Inc from the list of organizations, to support SHE at no extra cost to you.**

Please consider these other ways to donate which allow for the use of international bank accounts:

- Our [MightyCause](#) (formerly Razoo) crowdfunding page.

- Sending a check addressed to Solar Household Energy, to: Richard Stolz, 5 Lochness Ct. Rockville, MD 20850-2950, United States

In case you missed it, here is a testimonial video featuring Esther, a senior woman living in Tlacolula, Oaxaca, enthusiastically describing the wonders of her new Haines solar cooker.

Click link to view on Youtube.
 Esther, a customer of Lorena Harp's solar cooker social enterprise in Oaxaca, launched with SHE's support, describes how beans and other dishes taste better when cooked in the Haines solar cooker, how it saves her gas, fuelwood, and time, and how she would like to have at least four solar cookers to cook different dishes simultaneously.

Your support will help us empower more people like Esther to change their lives for the better thanks to solar cooking. Please make a contribution today. Thank you!

Sophie Lyman, Executive Director, and the SHE Team

Donate to Solar Household Energy!

What your contribution can provide:

\$40 = Training of a solar cooking trainer/distributor (ambassador), and the means to effect change within their community.

\$75 = Three solar cooker kits for three families, and a smoke free environment.

\$150 = Four solar cookers and long-term follow-up for four families, and a means to self-sustainability.

\$500 = A month's worth of solar cooking social enterprise start-up costs, and enhanced capacity and livelihood.

Volunteer and internship opportunities in:

- technology research
- local education/demos
- field project support
- administrative support
- fundraising
- website/social media
- writing/editing
