

Solar Household Energy

Solar cooking for Human Development and Environmental Relief

Dear friends,

This year, SHE is participating in the **Combined Federal Campaign** for the first time! If you are a federal employee or retiree, please consider donating to our organization, CFC code 32400!

We are also looking for **global advisors!** Our ideal global advisor brings experience in international development, lives in a sun-rich, fuel-poor developing country, and has the interest and willingness to be our ears and eyes on the ground for preparing and implementing solar cooking projects. Please see our "[Get involved](#)" page for more information.

SHE is hiring a **program assistant!** The ideal program assistant lives in the Washington, DC area, can work remotely, on a part-time, flexible basis, brings experience in international development, and program management, among other qualities. For more about this opportunity to help promote solar cooking around the world, empower women, and protect the environment, please see our "[Get involved](#)" page, or apply via [Idealist](#).

We look forward to hearing from you!

Sophie Lyman, Executive Director,
and the SHE Team

Solar Household Energy
c/o Richard Stolz
5 Lochness Ct.
Rockville, MD 20850-2950

What your contribution can provide:

\$40 = Training of a solar cooking ambassador in a rural Mexican village, and the means to effect change within their community.

\$75 = Three solar cooker kits for three families, and a smoke free environment.

\$150 = Four solar cookers and long-term follow-up for four families, and a means to self-sustainability.

\$500 = A month's worth of solar cooking social enterprise start-up costs, and enhanced capacity and livelihood.
